

STOCK MARKET is a planned action of the FAN-BEST project whose final objective is to be a tool for the transfer of innovations and cutting-edge technologies in the sustainable exploitation of marine and maritime resources.

In short, it is a meeting point between RDI entities, technology centres, companies and startups related to the Blue Economy and investment entities potentially interested in making an Atlantic Area competitiveness pole.

STOCK MARKET

PORTAL FOR THE TRANSFER OF BLUE ECONOMY
INNOVATIONS AND TECHNOLOGIES IN THE ATLANTIC AREA

WHAT IS STOCK MARKET?

COOPERATION, INTEGRATION AND
COMPETITIVENESS OF THE
BLUE ECONOMIC SECTOR

A meeting point for RDI entities, technology centres, companies and startups related to Blue Economy.

A tool for transferring innovations and cutting-edge technologies into the sustainable exploitation of marine and maritime resources.

HOW DOES IT WORK?

1

As a portfolio of technologies and innovations based on marine and maritime resources or related to the different sectors of the Blue Economy which are close to the market that are seeking funding.

2

The website will have a directory of investors potentially interested in investing in this technological offer developed by the Atlantic Area RDI agents in the field of the Blue Economy.

Within the framework of the FANBEST project, co-financed by the European Regional Development Fund (ERDF) through the Interreg Atlantic Area 2014-2020 Programme, the University of Santiago de Compostela (USC) is promoting a series of activities to intensify the transfer of technologies related to the blue economy to SMEs.
